

# INTEGRATE ERP, CRM, & MARKETING AUTOMATION SOFTWARE

Connecting disparate enterprise software solutions is a challenge for any business. When companies connect this data automatically, the result is transformational. All facets of the organization are using the most up-to-date information at all times without time-consuming data reconciliation between departments.

Connect your enterprise data with Datix's pre-built proprietary application, Unity, which creates bidirectional communication between a business's ERP and CRM solutions. Unity monitors each platform to check for new data and automatically shares that data with the other system. Unity is fully scalable and works regardless of your software version.

**SUCCESS**  
 **99.7% FIRST-TRY SUCCESS RATE**

Unity works: it's the proven integration solution

We're experts in ERP and CRM with real industry knowledge. No one has more experience integrating ERP and CRM data than Datix.

Unity saves time and increases productivity. A recent survey of Unity clients with SMBs indicated that Unity saved the organization, on average, 50 hours of work per month.

**EXPERTISE**

- OVER 200 MILLION RECORDS INTEGRATED PER YEAR**

# EXPERIENCE THE BENEFITS

Detect buying trends and enable precise demand planning with customer data.

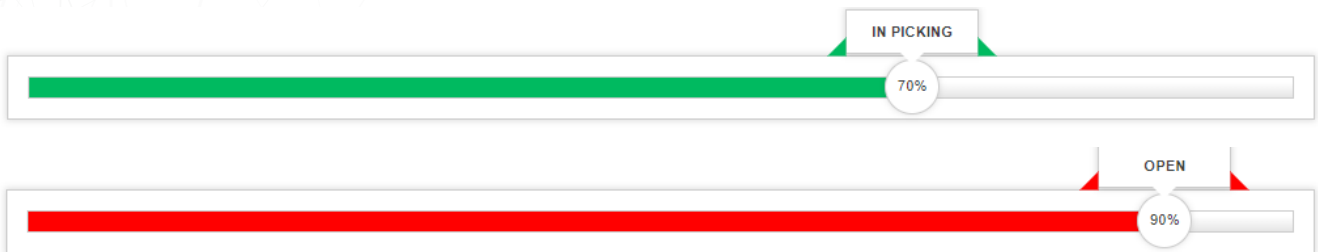

Save time and close more deals by automating pricing or inventory data in CRM instance.

Gain customer insight and generate personalized campaigns based on user behavior.

All departments receive more accurate and consistent information on their schedule.

Account: [ABC Manufacturing](#)  
Erp OrderNum: 5659  
Order: [00000258](#)  
Erp Order Total: \$35208.00  
Need By Date: 30 August 2019  
Ship By Date: 30 August 2019

Our Unity integration solution includes a convenient and time-saving Order Tracker that uses ERP data to provide sales and service reps updates on order statuses from your CRM dashboards.

## SUPPORT ALONG THE WAY

Unlike any other integration service, Datix connects you with an Integration Support Specialist who is assigned to your account and monitors your integration throughout the day, so you don't have to. Your ISS is available by phone or email to support you every step of the way, and this is included at no extra charge when you partner with us.

In a recent survey, **100%** of current Unity clients said their ISS cares about their account and their success with Unity!

**"My success is the success of our clients. My goal is to do everything I can to make sure they are supported and getting 100% of the benefits of partnering with us!"**

– Bryan Starks | Datix Integration Support Specialist (ISS)

Ready to see if a Unity integration will improve your business?  
OR do you just want some additional options to maximize your current investment?
