

NO CUSTOM CODING KNOWLEDGE REQUIRED

Unity is a rapidly deployable and flexible solution that delivers seamless integration between Infor SyteLine + Infor CloudSuite and Salesforce CRM - with no coding required on your end.

DRIVE EXPONENTIAL REVENUE GROWTH

By integrating Infor SyteLine + Infor CloudSuite with your CRM or marketing automation software and combining your front-and-back-office data, your organization can power new growth. Expect better sales performance, improved customer service, and more flexible production and inventory management capability.

THE PREFERRED INFOR INTEGRATION PARTNER

Datix designed the first pre-built, managed solution to integrate Infor ERP instances with CRM. Our consultants and development team used their 25+ years of experience to build the application - we have proven Unity can improve your business.

Pre-built integration for Infor SyteLine + Infor CloudSuite and Salesforce.

Managed for you, scalable and able to operate out of one system.

Customizable, so complex customer account structures are a non-issue.

Access to order history, inventory, pricing, invoices, and other relevant data without custom coding or custom integration.

MANAGED APPLICATION

Regular updates and expert-level support at no additional charge.

INVISIBLE TO END-USERS

Executed without IT or user involvement.

NIMBLE CUSTOMIZATION

Maps custom fields using an online API integration program.

RAPID DEVELOPMENT

Pre-built solution with standard mappings between your systems.

MINIMAL IMPACT

An effortless installation with no coding, new login, or interface required.

FLEXIBLE USAGE

Scheduled processing and real-time data transfers.

PRIVATE + PUBLIC CLOUD OPTIONS

Integration no matter where the instance is hosted.
